

EntropySoft Signs OEM Agreement with Coveo

EntropySoft's Catalogue of Content Connectors Extends the Reach of Coveo's G2B Suite

Paris, Québec – September 17, 2008 –EntropySoft, the specialist of the Enterprise Content Integration (ECI) market, today announced a new OEM agreement with [Coveo](http://www.coveo.com) (www.coveo.com) to integrate a wide selection of bidirectional connectors from EntropySoft into its flagship G2B Information Access Suite. The OEM deal empowers Coveo customers with expanded, out-of-the-box connectivity for accessing more critical information across the enterprise.

While Coveo already offers connectors for several leading enterprise content databases, the new agreement with EntropySoft will allow Coveo to expand its portfolio to include connectors for Alfresco, FileNet P8, Hummingbird DM, Interwoven TeamSite, Microsoft SharePoint 2003, IBM Lotus Quickplace – all of which have been developed and fully tested on large implementations in critical business projects.

"Everyday, there are more and more content silos. EntropySoft's mission is to increase content interoperability. Today we deliver to Coveo critical connectivity to all these repositories" said Nicolas Maquaire, CEO and co-founder of EntropySoft. "We bring to this partnership our expertise in content-centric applications through our leading technology."

EntropySoft's portfolio consists of more than 25 bidirectional connectors, the single largest offering of connectors on the market. The plug and play connectors are designed for major applications such as Microsoft SharePoint, EMC Documentum, FileNET P8, Open Text LiveLink, Alfresco , IBM DB2 Content Manager On Demand...

"We are, of course, very pleased to extend the value that our G2B solutions bring to the marketplace through our agreement with EntropySoft," said James Waters, Coveo's vice president of marketing. "We continue to expand our product capabilities so that our customers can meet the growing need to navigate and access more and more critical information silos and drive better business."

EntropySoft builds its integration strategies on this portfolio of bidirectional connectors. They implement the main features of all connected applications. The connectors simplify the access to content repositories for software companies and large organizations. The EntropySoft's technology is used by many software industries and many large organizations. This increases the interoperability potential that EntropySoft offers.

About EntropySoft

EntropySoft is focused on the integration of unstructured data and is a pure-player in the ECI global market (Enterprise Content Integration). An information access expert, EntropySoft's mission is to break down technological barriers that hinder the use of companies' content assets and make content interoperability easy.

EntropySoft has the most extensive bidirectional connectors' portfolio in the market and is promoting a disruptive innovation with its Content ETL product.

Leading global organizations like BNP Paribas, Total and Endeca rely on EntropySoft technology. For more information, visit www.entropysoft.net.
