

## Press Release

### **IDS Scheer offers integrated Repository for Comprehensive BPM and CMS**

***One stop shopping: Content of ARIS and Content Management Systems will be merged for overall access to data***

*Paris, Saarbruecken, January 07, 2009*

**IDS Scheer, world leading provider of BPM software and solutions and EntropySoft, specialist of the Enterprise Content Integration (ECI) market, today announced a new agreement to integrate bidirectional connectors to Content Management Systems into the ARIS Platform.**

All employees of a company will benefit from the new offering as they will directly manage and control all process information, independent of the fact whether it is genuine ARIS content or the content is stored in individual Enterprise Content Repositories. Extensive read/write connectors enable ARIS to fully integrate with all major content management systems such as EMC Documentum, Microsoft SharePoint, LiveLink, Lotus Notes or IBM FileNet.

“A normalized access to all CMS applications is now a necessity for all software vendors who need to interact with documents and folders.

EntropySoft is proud to empower ARIS Solutions with our full-features connectors.” said Nicolas Maquaire, CEO and co-founder of EntropySoft. “We also bring to this partnership our vast expertise in content-centric applications.”

“Based on our new ARIS component, we can provide to all our clients unique, easy to use and seamless access to any kind of data from Content Management Systems that are relevant to business users in a process oriented way.” said Karl Wagner, Head of ARIS R&D - Product and Solution Management, IDS Scheer AG.
