

## EntropySoft and Digital Reef Sign a Technology Agreement

*EntropySoft's Enterprise Content-Centric Connectors Extend the Reach of Digital Reef's Unstructured Data Management Platform*

**Paris, France and Boxborough, Mass. – June 30, 2009** – EntropySoft, specialist in the Enterprise Content Integration (ECI) market, today announced a technology agreement with Digital Reef, developer of the first massively scalable unstructured data management platform. Digital Reef is integrating a wide selection of enterprise connectors from EntropySoft into its Unstructured Data Management Platform. The inclusion of EntropySoft technology expands out-of-the-box connectivity for Digital Reef customers, ensuring easy access to unstructured data across the enterprise for eDiscovery, risk mitigation, compliance and strategic storage initiatives.

The agreement will enable Digital Reef to integrate a portfolio of more than 30 read/write connectors. All major Enterprise Content Management Systems are present in EntropySoft's portfolio, and all connectors have been fully tested on large implementations in critical business projects.

*"EntropySoft is the leader in connectivity,"* stated Steve Akers, President and CEO of Digital Reef. *"Our objective is to provide easy-to-use and deploy data discovery and management solutions that help enterprises gain control over unstructured content. Best-of breed technology partnerships, like our partnership with EntropySoft, enable us to enhance our solutions, while concentrating on our core competencies."*

*"With the steep increase in unstructured data and increased pressure on indexing every piece of information in the enterprise, content access has become a top priority of information management. There is an ever increasing number of content repositories in most companies. We are delivering to Digital Reef critical connectivity to a large number of repositories,"* said Nicolas Maquaire, CEO and co-founder of EntropySoft. *"We also bring to this partnership our vast expertise in content-centric applications and our market-leader technology."*

EntropySoft is a connector factory. It has more than 30 read/write enterprise connectors for unstructured data, possibly the biggest portfolio in the market. The extensive support of features and the size of the connector portfolio make this technology perfect OEM material for many software industries. The state-of-the-

art connectors help customers focus on their differentiators, allowing them to concentrate on their core business while EntropySoft takes care of the connectivity.

Digital Reef is the first massively-scalable unstructured data management platform for automatically discovering and managing large stores of information assets. Digital Reef accelerates and informs the eDiscovery process to save time and money, aligns IT and storage management with the needs of the business and empowers storage reclamation, identifies and helps secure sensitive content to mitigate risk in unstructured data and helps leverage existing corporate knowledge for improved business processes and competitive advantage

### **About EntropySoft**

EntropySoft is focused on the integration of unstructured data and is a pure-player in the ECI global market (Enterprise Content Integration). An information-access expert, EntropySoft's mission is to facilitate content access and make content interoperability easy.

EntropySoft technology is used by software vendors to simplify the integration between their solution and all content management solutions. Applications fields are numerous (BPM, e-discovery, Records Management, Collaboration, etc.). EntropySoft has the most extensive read / write connector portfolio in the market. EntropySoft promotes a disruptive innovation with its Content ETL product which is used for Records Management and SaaS.

The following leading global organizations integrate EntropySoft connectors: Attivio, Coveo, Endeca, Exalead, IDS Scheer, Image Integration Systems, and Jahia. For more information, visit [www.entropysoft.net](http://www.entropysoft.net).

### **About Digital Reef**

Digital Reef has created the first massively scalable unstructured data management platform for automatically discovering vital information trapped within vast stores of unstructured data. By rapidly examining all of an enterprise's data and identifying relevant content, Digital Reef allows organizations to respond quickly when called upon to find specific information—even if they didn't previously know they had it. Large enterprises use Digital Reef to significantly reduce the burden, cost, and risk associated

with locating and producing required information for eDiscovery, risk mitigation, knowledge reuse, and storage management processes. With Digital Reef, enterprises know what they have, where it is, and how to access it when they need it. Digital Reef is headquartered in Boxborough, Mass.
