

EntropySoft, the CMS connectivity leader, releases a new Autonomy iManage WorkSite connector.

Paris, September 15, 2009 - EntropySoft, specialist in the Enterprise Content Integration (ECI) market, today announced the release of a new Autonomy iManage WorkSite connector. By making available a new version of this connector, EntropySoft is increasing again its unrivalled interoperability capacities and the attractiveness of its product offer.

EntropySoft's Autonomy iManage WorkSite connector enables read and write access to content stored in the Autonomy iManage WorkSite repository. It also supports searching for documents and covers most of the underlying features of the software, such as security, workspaces etc...

"This new connector is part of the latest release of our connectors' portfolio which includes significant improvements across all our connector line of product." said Raphael Jean, CTO and co-founder of EntropySoft. "We hope that by taking our connectors to a new quality level, we shall not only increase our existing customers' satisfaction with our technology but also win new ones. Ultimately we move closer to our objective of being the technological reference for universal access to all content silos."

EntropySoft is one of the world leaders for connectivity. It has more than 30 read/write enterprise connectors for unstructured data, possibly the biggest portfolio in the market. The extensive support of features and the size of the connector portfolio make this technology perfect OEM material for many software industries. The state-of-the-art connectors help customers focus on their differentiators, allowing them to concentrate on their core business while EntropySoft takes care of the connectivity.

All major Enterprise Content Management Systems are present in EntropySoft's portfolio: Alfresco, EMC Documentum eRoom, IBM FileNet P8, OpenText LiveLink and eDOCS, Interwoven TeamSite, IBM Lotus Quickplace, Microsoft SharePoint etc... All connectors have been fully tested on large implementations in critical business projects.

The large number of connectors and the completeness of the features included make this technology perfect OEM material for many software industries such as Search, BPM, DLP and collaboration.

Interoperability has been EntropySoft's core business for the past 4 years.

About EntropySoft

EntropySoft is focused on the integration of unstructured data and is a pure-player in the ECI global market (Enterprise Content Integration). An information-access expert, EntropySoft's mission is to facilitate content access and make content interoperability easy.

EntropySoft technology is used by software vendors to simplify the integration between their solution and all content management solutions. Applications fields are numerous (BPM, e-discovery, Records Management, Collaboration etc...). EntropySoft has the most extensive read / write connector portfolio in the market. EntropySoft promotes a disruptive innovation with its Content ETL product which is used for daily transfers and cloud synchronization.

The following leading global organizations integrate EntropySoft connectors: Attivio, Coveo, Digital Reef, Endeca, Exalead, IDS Scheer, Image Integration Systems, Jahia, Kazeon and W4.
